*Prof. Nirav D Mehta, coordinator of VGEC GIC club* brainstormed the students with various phases of startups

To build empathy, looking is just not enough!!!

- start gazing
- start internalizing the pain
- start socializing engineering principles
- Address Issues of not only haves but also for have-nots to make the Global growth more inclusive.

Innovations..... that take away your pain. Innovation is not always involved ..... it only depends on empathy of user. Innovate to Grow..... not only to Survive. Enough of talks.....it's a time of action – are few strong thoughts of *Prof. Mehta* for nurturing the students with conceptual fundamental of startups.

Further process:

GIC VGEC Club will work in coordination with NSS VGEC in the domain of social service and these ideas planted will be taken to the next level.
